ANDREI MURASHEV

Hello! 👋

I am developer with 10+ years experience (7 of them as remote-worker).
I like frontend because I like to see result of my work and I am addicted to create interesting interfaces 😏

TECHNICAL SKILLS

- 8+ years business application experience and customer-facing products
- Strong knowledge of JavaScript (ES6) and TypeScript;
- Strong knowledge of CSS, flex and grid layout, responsive design
- Strong ReactJS experience
- Experience in developing high-performance websites using Next.js nd Node js (Express.js)
- Experience with CSS frameworks (Tailwind CSS, Styled-components, css-modules)
- Experience with Payment systems (Adyen, ChargeBee, Stripe)
- Experience working with Design Systems (Ant)
- Experience with CI/CD pipelines using GitHub Actions
- Experience with localization support (react-intl).
- Strong Git skills, experience working with the mono-repository and code review processes
- Experience with Agile Principles (Scrum) and Shape Up (Basecamp) methodologies
- Unit and integration tests: Experience with Jest, Storybook
- Experience working with REST APIs, GraphQL APIs, WebSockets
- Experience with React Query, React Hook Form libraries
- General knowledge of common web security best practices and vulnerabilities (XSS, CSRF, etc.)
- Knowledge of server-side rendering techniques and architectures
- Knowledge of how to measure and optimise performance
- Experience with build and deployment tools (Vercel)
- Familiar with concepts like SOLID, KISS and Clean Code

SKILLS

TypeScript, Javascript, React.js, Next.js, Node js, Express.js, GraphQL, CSS, Tailwind CSS, Styled-components, SCSS, Git

LANGUAGES

- Russian - Native
- English - B2
- Spanish - A2

- Familiar with A/B Testing strategy (GrowthBook)

PERSONAL QUALITIES

- Responsibility: I'm not afraid to take any responsibilities, but I am completely aware and understand how many responsibilities I can conduct that it do not slow down my work performance

- Respecting Deadlines: Based on my experience I can predict how much time required for specific task. Meeting a deadline for me it is personal challenge

- Effective Communication and ensuring a harmonious working atmosphere: I strive to maintain warm and friendly communication with all team members, I am ready to help anyone (or find someone who can help) and do not shy to ask questions

- Work efficiency and Business orientation: I always try to resolve a task the fastest and most convenient method, be oriented on business logic, try to predict these changes on code base and be focused on delivering value

- Autonomy and Discipline

- Love solving complex problems with practical, efficient solutions

- Prefer simple solutions over complex ones (KISS)

- Ability to work well both autonomously and as a part of a team.

EDUCATION

Pskov State University (Pskov, Russia) — Computer Science and Engineering, Bachelor of Science, 2011

EXPERIENCE

Senior Frontend Developer, StarOfService (Remote)
— Apr 2017 - Jul 2024

Participation in development of the front-end part of marketplace service (https://www.starofservice.com)

Long list of responsibilities during 7 years period. Long story short: pivot role in the FE department

- Development of FE part of application: implementation of features by Product manager's specifications

- Conducting releases of FE part of application

- Mentorship and onboarding: Active participation of code reviewing of another developers, mentoring new participants of FE team
- Tech leadership: participation in planning of FE application architecture, Participation in development of component for micro-services architecture, Migration from legacy applications to new ones
- Interaction with different teams (Design team, Data team, QA team, Product team, l18n team)
- Participation in: sprint planning, technical design, demo meetings

Technical stack

During the development technical stack was changed several times. Here I described 3 "epoch" of the FE application during my work on this company

- Actual one: TypeScript, React, NextJs, Tailwind, GraphQl, react-query, RadixUi, ESLint, Jest
- Legacy one: TypeScript, React, ExpressJs, Styled-components, ESLint, Enzyme
- Legacy-legacy one: Javascript, React, Redux, Sass, Css-modules, Webpack, ESLint

Senior Frontend Developer, LabelUp (Saint-Petersburg, Russia) — Jun 2016- Mar 2017

Development of FE part of application from scratch. Interaction within engineering team (2 BE, 1 FE, 1 Mobile developer)

- Development of FE part of application
- Development of FE application architecture
- Participation in development of component for micro-services architecture
- Conducting releases of FE part of application
- Interaction with Back-end team
- Interaction with product team on all specification related questions

Stack: ES 2015, React, Redux, Sass, CSS-Modules,Webpack, Ruby on Rail

Middle Frontend Developer, Calvera (Saint-Petersburg, Russia) — Oct 2015- May 2016

Participation of development of FE part of company services. Interaction with FE and BE development teams
Stack: React.js, Node.js, Git, JavaScript, SCSS, Webpack

Junior Frontend Developer, PERCo (Saint-Petersburg, Russia) — Aug 2013 - Oct 2015

Implementation of FE part of access control and management system

Web-master, Altera (Saint-Petersburg, Russia) — Nov 2012 - Aug 2013
